DETAILED ACTION

1. Lack of Unity

A. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 17-19 in part, 20, 22 and 30-35, in part, drawn to a method of producing a polypeptide of SEQ ID NO:1.

Group 2, claim(s) 17-19 in part, 21 and 23-29 and 30-35 in part, drawn to a method of producing a polypeptide of SEQ ID NO:2.

The inventions listed as Groups I-II do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: the special technical feature of Group I is the polypeptide of SEQ ID NO:1. The special technical feature of Group II is the polypeptide of SEQ ID NO:2. The special technical feature of each group is not the same, or does not correspond to the special technical feature of any other Group. The products of Groups I-II are structurally and functionally distinct and the methods require different method steps and reagents for achieving different goals. The Groups are not linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept.
